

Bulk Hopper

Description

The Watson & Brookman Bulk Hopper uses a double reduction gearbox plus chain to drive a heavy duty rubber belt to provide a steady and even flow of product.

The high sided hopper and wide belt can accommodate over 1 tonne of product at a time.

Robust design and low maintenance drive system ensure that the Bulk Hopper is a highly reliable machine.

Available in the 4 sizes to suit your individual requirements. Each Bulk Hopper is compatible with all sizes of W&B Box Tipper.

Construction

Fully stainless steel construction as standard. Belt is heavy duty rubber. Heavy duty materials ensure continued operation in the most robust of environments.
